DISK DEMON

DATEL ELECTRONICS

The Datel Disk Demon is an exciting new product for the 1541 owner!! If you own a 1541 you will know that although they are reliable in operation they are very slow. Fast load cartridges such as Diskmate and the disk turbo on Action Replay, can speed up the process quite considerably with load times down to as low as 10 seconds for a typical game program. But this is about as fast as you can get with the 1541 standard system because it has a serial data transfer. This means that all the data is transmitted down just two wires hence there is a limit to the speed.

The new DISK DEMON is a true parallel operating system for the 1541 and brings speed of loading and saving that were never dreamed of!! Just imagine a typical game of say 202 blocks LOADING IN 2.5 SECONDS. Disk Demon is easy to fit consisting of 2 main assemblies - one plugs inside the disk drive and the other inside the 64/128. Usually no soldering is required. Now plug the parallel cable into the user port of the 64/128 And thats it. You then have the fastest disk operating system available anywhere, at any price for the 1541.

Just look at the features;

* LOADS AT 60 TIMES NORMAL SPEED (program files)(202blocks 2.5 secs)
* LOADS AT 20 TIMES NORMAL SPEED (seq files)
* SAVES AT 25 TIMES NORMAL SPEED (prg files) (202 blocks 8 secs)
* SAVES AT 20 TIMES NORMAL SPEED (seq files)

Disk Demon is not only a superfast system. It also features a brand new set of disk commands that do all the things that it should have done to start with... plus many more.

* 16 FUNCTION KEYS. including LIST ,SAVE, LOAD, RUN, DIRECTORY,OLD,VERIFY,FAST FORMAT,GOODBYE etc. etc.

* FORMAT DISKS UPTO 749 BLOCKS. * LOCK/ UNLOCK FILES.

* UNIQUE FLOAD COMMAND . WILL LOAD FILES UPTO 250 BLOCKS.
  NB. Other systems such as Dolphins Dos can't cope with files of over 202 blocks. This makes D.Demon super-powerful when used with Action Replay III. ie. An AR3 backup will reload in UNDER 3 SECS!!

* BUILT IN FILE COPIER. Will copy files UPTO 250 BLOCKS at the press of a function key. Super fast - complete process takes about 15 seconds including the save.

* User port through bus is supplied free to allow other devices to be connected at the same time. (with Dolphin you pay 14.99 for just this bit.)

* A HOST OF OTHER NEW COMMANDS including Number conversion,Unstopable reset , ON/OFF etc etc. Plus all other disk operations including Scratch, Verify etc are also speeded up to a similar degree.

* DISK DEMON is highly compatible with commercial software. On the odd occasion where there is a problem it is switched out at the flick of a switch. The system will then return to the original DOS.

*** When you compare parallel systems remember that Disk Demon not only has more features the others... it also works at at least TWICE THE SPEED of any other currently available. So don't sit waiting for that disk to load .. ORDER DISK DEMON NOW!!!!!!

DISK DEMON COSTS 64.99 post free.A Utility disk is available with 15 second disk copier,superfast selective file copier and file splitter. price is 7.99 or 4.99 when bought with Disk Demon.

* TIMINGS DO NOT INCLUDE SEARCHTIME
